

# Full Android UI

In this example you will put everything you've learned together to build your first Android UI like a pro. If you can build this UI, you can build anything.

## The Challenge

1. Download DeltaConnectIt.zip and open the code in Android Studio.
2. Navigate to the **activity\_connect.xml** file and double click it.
3. Use your knowledge of android view xml to create the following UI from scratch.
4. Admire how good it looks.
