Activities and Intents

Use your knowledge of Activities and Intents to switch back and forth between two activities

The Button

1. Download DeltaActivites.zip and open the code in Android Studio.

2. Create a SecondActivity class and set its content view to be **activity_second.xml**

3. Put the SecondActivity in the Android Manifest so that its accessible via intents

4. Create a button listener for the "Second Activity" button in the FirstActivity.

5. Override the onClick of that button to create an intent and Launch the SecondActivity.

6. Repeat the process to launch an intent to start the FirstActivity from the "First Activity" button in the Second Activity.

7. Flip back and forth between these two Activities until you are satisfied you're awesome.
